TEAMWORK

The bachelor program at Weber State involved several projects that involve working in a group to simulate industry-level work environments.

Project Examples:

- Learning Management System in ASP.Net

- Invoice system in WPF

- Social Site in ASP.Net

SKILLS

- Proven ability to adapt to multiple programming languages and development environments

- Proven discipline, communication, and flexibility.

- Proficiency in both frontend and backend development.

- Familiarity with github and the git command line

Experienced developing in the following environments:

- Visual Studio
- VSCode
- Linux command-line
- Eclipse

Experienced writing code in the following:

C#, Python, Java, SQL, HTML, Javascript, CSS, C

EDUCATION

Graduated with Bachelor of Science in Computer Science
Weber State University | Ogden, UT - Grad Date: August 2025

Relevant Coursework: ASP.Net and Django Applications utilizing Frontend and Backend development. SQL/Database proficiency. Various programs written across multiple languages. Learned important knowledge in technical computer science aspects, and how to create higher scale projects in both an individual and group environment.

EXPERIENCE

E-Commerce Management, In-Store Advertising | Soelberg's Market
June 2019 – September 2024

Development Intern, Payments | 365 Retail Markets
May – August 2025

- Created documentation on card reader applications. This involved making documents with dozens of pages explaining the code on a high level. The documented code was written in C

- Made good headway on a Java web application that would allow for more streamlined organization of terminals for the payment development teams. This web app utilized springboot and gradle

- Useful skills learned at this internship include: API calls in a web application. Familiarization with business coding practices. Significant work utilizing Github Copilot to code with best practice more efficiently.

These jobs provided vital experience in digital business management and working with business-related programs.
